JOURNAL QUALITY LIST

Seventy-first Edition, 31 October 2024
Professor Anne-Wil Harzing, <http://www.harzing.com>

Introduction

The Journal Quality List is published primarily to assist academics to target papers at journals of an appropriate standard. We would be concerned if the list were used for staff evaluation purposes in a mechanistic way. Whilst every effort has been made to ensure the accuracy of the Journal Quality List, we recommend that it be checked before used extensively for evaluation purposes. The editor will not be held responsible for omissions or errors.

Acknowledgements

The first version of the JQL was collated when the editor was affiliated with the University of Bradford School of Management (UBSM). The editor gratefully acknowledges the assistance and contributions of the following people: Kathy Cousens (UBSM) for the initial data entry work, Victoria Lim, Ulrike Magner, Sebastian Reiche, Dinuka Wijetunga, Shea Fan, Sofie Schütte, Markus Goelz (all University of Melbourne) and Sara de Marco (Middlesex University) for data entry work between 2006 and 2015, Jos Benders, Yehuda Baruch, Malachy Carey, Graham Hooley, Andrew Kirchner, Gunther Maier, Rudolf Sinkovics, and Heinz Tuselmann for pointing out and supplying me with various journal ranking lists and providing corrections. A special thank-you goes to Yves Barlette for consistently reliable updates on new versions of any of the French rankings and to Lars Nondal for updating the Danish Ministry list.

Subject areas and abbreviations

Abbreviation	Subject area
Bus Hist	Business History
Comm	Communication
Economics	Economics
Entrep	Entrepreneurship
F&A	Finance & Accounting
Gen & Strat	General & Strategy
IB	International Business
Innovation	Innovation
Marketing	Marketing
MIS, KM	Management Information Systems, Knowledge Management
OB/OS, HRM, IR	Organization Behavior/Studies, Human Resource Management, Industrial Relations
OR, MS & POM	Operations Research, Management Science, Production & Operations Management
PSM	Public Sector Management
Psychology	Psychology
Sociology	Sociology
Tourism	Tourism

DISCUSSION OF THE RANKINGS

Removal notes

71st edition – removed the JOURQUAL 2015 ranking. Some 100 journals were removed that – after removing older rankings – only appeared on one or two rankings and/or were rated with either the lowest or the one but lowest rating. Although mindful of the need for continuity, keeping these journals wasn't deemed consistent with the JQL policy that new journals are only added if they are ranked in the top ranks on at least **one** of the constituent rankings. Many of these journals were also in research areas tangential to Business & Economics. Removing these journals creates a more level playing field between new journals and journals that just happened to be ranked on the oldest rankings in the JQL. In many cases these old rankings were based on far less rigorous procedures than the rankings currently included in the JQL.

Note: the CNRS and HCERES rankings appear to have been abandoned. They are maintained in the 71st edition, but if no new versions appear, they will be removed in the 72nd edition.

68th edition – removed older rankings (EJIS 2007, WIE 2008, UQ 2011) not updated by their providers and/or likely to have been replaced by the ABDC and ABS rankings.

66th edition – The 2019 ABDC ranking removed quite a few journals that ceased operation, no longer met the quality threshold, or were no longer deemed sufficiently business focused. Most of these journals had never been included in the JQL in the first place as they didn't meet the threshold criteria. However, about a dozen journals were listed in the JQL. Removal of their ABDC ranking meant that some journals in the JQL were now ranked on only a few rankings. In many cases their remaining ranks were also very low. This wasn't deemed consistent with the JQL policy that new journals are only added if they are ranked in the top (two) ranks on at least one of the constituent rankings.

The editor therefore decided to remove some 15 journals that were:

- not ranked in the top (two) ranks of at least one of the constituent rankings **and**
- not ranked at all on either of the two most-used rankings [ABDC and ABS].

This means that if journals currently on the JQL are ranked on either the ABDC or the ABS list they remain listed on the JQL even if they have a lower rank than would be needed to enter the JQL. Given the number of academics relying on the JQL for continuity this was deemed an appropriate level of conservatism in terms of removing journals.

61st edition – removed two French single university rankings (HEC 2011) and ESSEC (2016) as French universities now seem to use one of the three country-wide rankings.

60th edition – removed older rankings (UQ 2007, Aston 2008, Cranfield 2012) not updated by their providers and/or likely to have been replaced by the ABDC and ABS rankings.

53rd edition – removed older rankings created between 2001-2005 and not been updated since then by their providers. Also removed a range of journals in non-core Economics & Business areas that – after removing the older rankings – only appeared on a single ranking list.

FT 2016 – Financial Times Survey of Top Business Schools 2010/2016

Journals used by the Financial Times to compile lists of top Business Schools, marked with 1 in the JQL. The list was originally constructed in 2003, revised in 2010 increasing the number of journals included to 45, and again in 2016 increasing the number of journals to 50 [2016].

CNRS 2020 — Centre National de la Recherche Scientifique (www.cnrs.fr) June 2020

The list of journals was constructed through consultation with experts in the field, both in France and abroad. Directors of the various research groups (and through them the researchers in these groups) were consulted in an iterative process. Rankings of foreign universities were also consulted as well as listings such as SSCI and EconLit. Only academic peer-reviewed journals were included in the list, which therefore excludes high-ranked professional journals such as Harvard

Business Review. Rankings are based on: academic reputation, audience, and impact. For more information and the full list see: <https://sites.google.com/site/section37cnrs/Home/revues37>.

The list is updated twice a year (in spring and autumn) after a meeting of CNRS Section 37. The Spring session is devoted to considering new requests submitted by the community (including journals' editors) to upgrade, downgrade or exclude journals already listed, or to include new ones. The Autumn session re-evaluates a sixth of the list in each domain.

[Editor's note 1] In order to keep the JQL to a manageable length, lower-ranked journals (ranking 2-4) of the CNRS list were only added if they already featured in the JQL. Journals in Law, Agricultural/Energy Economics and Health that were not already included in other lists were also excluded, as were French journals.

[Editor's note 2] Previous lists appeared to have a bias towards Economics and (to a lesser extent) towards the more quantitative fields of Business (F& A, IS and OR). This bias has been largely addressed in later lists. Many journals in Management & Marketing were upgraded, whilst several journals in Finance & Accounting were downgraded. Even so Management & Marketing still appear to be somewhat undervalued in comparison to other rankings in the JQL.

[Editor's note 3] This list is no longer updated. We will keep in the JQL until it is five years old.

Rank	Interpretation
1*	Highest quality rating (only 15 journals were given this ranking)
1	Intermediate quality ratings
2	
3	
4	Lowest quality rating

Den 2021 — Danish Ministry Journal list mid-2021

In collaboration with academics, the Danish Ministry publishes an annual list of journals it recognizes as peer-reviewed and of a particular quality. It assessed those included in the list of over 20,000 journals with a rank of 1, 2 or 3 [see below]. Of the almost 950 journals in the JQL around 45% are scored 2 or 3, clearly indicating that the JQL tends to focus on high quality journals. The highest (3) rank was introduced recently and doesn't seem to be applied frequently in Business & Economics. Currently, the moment only 5 journals [all in Economics] carry this rank.

[Editor's note 1] This list is no longer updated. We will keep in the JQL until it is five years old.

Rank	Interpretation
3	Most prestigious journals (0.1% of total)
2	Particularly distinguished journals (16% of total)
1	Ordinary journals (84% of total)

HCERES 2021 — High Council for Evaluation of Research & Higher Education, July 2021

The HCERES journal list has been constructed by the section 37 of the CNRS, in consultation with academics from institutions such as CNRS, INRA and CNU. It has continuously evolved over time. The 2020 update is a combination of the CNRS 2019 and FNEGE 2019 lists. Journals ranked 1*, 1 or 2 on these lists were classified as A, journals ranked 3 as B, and journals ranked 4 as C.

This means that as long as a particular journal had a rank of only one above the lowest of five ranks on **either** the CNRS or the FNEGE list it would be ranked as B, if it had a middle rank (of five) on **either** list it would be ranked A. As such there is less differentiation in the highest rank than in other journal rankings with 38% of the ranked journals in the highest (A) category and another 36% in the B category.

[Editor's note 1] In order to keep the JQL to a manageable length, lower-ranked journals (ranked B, C or unranked) of the HCERES 2020 list were only added if they already featured in the JQL.

Journals in Law, Agricultural/Energy Economics and Health that were not already included in other lists in Business and Management were also excluded, as were French journals.

[Editor's note 2] No updates appear to be in the planning for this ranking. We will keep this ranking included until it is five years old]

ABDC 2022 — Australian Business Deans Council Journal Rankings List March 2023

The ABDC Journal List is a collaborative list developed by the Australian Business Deans Council that seeks to list journals relevant to Australian business academics and group these journals into four quality categories ranging in descending order from:

Rank	Interpretation
A*	Best or leading journal in its field - publishes outstanding, original, and rigorous research that will shape the field. Acceptance rates are typically low, and the editorial board is dominated by leading scholars in the field or subfield, including from top institutions in the world. Where relevant to the field or subfield, the journal has the highest impact factors or other indices of high reputation.
A	Highly regarded journal in the field or subfield - publishes excellent research in terms of originality, significance, and rigour, has competitive submission and acceptance rates, excellent refereeing process and where relevant to the field or subfield, has higher than average impact factors. Not all highly regarded journals have high impact factors, especially those in niche areas.
B	Well regarded journal in the field or subfield - publishes research of a good standard in terms of originality, significance and rigour and papers are fully refereed according to good standards and practices but acceptance rates are higher than for Tiers A* and A. Depending on the field or sub-field, will have a modest impact factor and will be ISI listed.
C	A recognised journal - publishes research that is of a modest standard and/or is yet to establish its reputation because of its newness. This tier is more inclusive than the others but only includes refereed journals.

The 2010 ABDC Journal List was developed after wide consultation across the sector and stakeholders, including over a dozen professional associations. Regular reviews followed. The last major revision in 2019 followed a very rigorous and completely transparent process. A nearly 100-page report with all changes can be downloaded here: <https://abdc.edu.au/wp-content/uploads/2019/12/abdc-2019-journal-quality-list-review-report-6-dec-2019.pdf>.

The 2022 ABDC ranking only conducted a light touch review, removing inactive and low-quality titles and adding a small number of journals. As most of the journals added were lower ranked, this didn't result in many changes to the JQL (see editor's note 2).

[Editor's note 1] The 2019 ABDC ranking included 144 upgrades, 17 downgrades, 157 new journals and the removal of no less than 241 journals that either ceased operation, no longer met the quality threshold for continued inclusion or were no longer deemed to be sufficiently Business focused [e.g. Journal of Experimental Psychology, Higher Education, Psychological Methods]. For reasons listed in the 2nd note not all changes were processed in the JQL. However, the number of changes in the 2019 JQL version of the ABDC ranking was much higher than any of the previous rounds and about 40 new journals ranked A or A were added.*

[Editor's note 2] In order to keep the JQL to a manageable length, lower-ranked journals (ranking B and C) of the ABDC list were only added if they already featured in the JQL. Also excluded were journals in the area of law, education (unless related to Management), psychology (unless related to OB), general social sciences (unless related to Management), statistics (unless related to Economics or Management) and medicine.

[Editor's note 3] Based on the 3-yearly intervals an update of this ranking is likely to come out in 2025.

FNEGE 2022 — Foundation National pour l'Enseignement de la Gestion des Entreprises, June 2022

A ranking created by the French Management Association. The FNEGE Scientific Board includes all the Academic Associations of Management representing the community of researchers in the field. In creating the list, the Association combined peer review with reference to a wide range of French and international journal rankings (all included in the JQL) as well as bibliometric indicators (ISI Journal Impact Factor, Google Scholar h-index, SCImago SJR).

Note: The 2022 ranking includes a wide range of Economics journals that previously were ranked in the CNRS ranking, which since 2021 is no longer updated.

[Editor's note 1] In order to keep the JQL to a manageable length, lower-ranked journals (2-4) were only added if they already featured in the JQL. The same principle was applied to French-language journals. Also excluded were journals in the area of health, politics, and medicine.]

[Editor's note 2] An update of this ranking is planned for 2025.

Rank	Interpretation
1*	Most notable management journals with a prominent position (only 30 journals)
1	Most notable management journals, very selective and particularly recognized in France and abroad
2	Highly selective journals with a very demanding peer review process
3	Very good journals with a good scientific reputation and significant contributions
4	Good journals with good selectivity and original contributions

META 2023 — An integrative ranking by a group of German scholars

This meta-rating condenses information from recognized international ratings. It focuses on the leading journals in business administration. The following ratings are included in the meta-rating:

- Australian Business Deans Council
- British Association of Business Schools (ABS) Ranking
- Centre National de la Recherche Scientifique
- Danish Ministry Ranking
- Erasmus Research Institute of Management Journals Listing
- Financial Times 50 Ranking
- Scimago
- UT Dallas

A meta-rating does not provide an independent evaluation of journals, instead it integrates existing current, valid, and often-used international journal ratings in a transparent way. The integration reduces measurement error, the resulting meta-rating is hence more valid than the individual ratings. The ranking was created by Christian Andres, Nikolaus Franke, Karen Gedenk, Jörn Schönberger, and Katrin Talke.

A detailed methodology for the ranking can be found [here](#). This methodology was discussed in the VHB (Verband der Hochschullehrer für Betriebswirtschaft) working group.

Rank	Interpretation
A+	Highest ranking (25 journals)
A	Middle ranking (75 journals)
B	Lowest ranking (250 journals)

[Editor's note 1] The scores in this ranking (A+ to B) equate to the top-3 scores in other ranking that have four or five categories. Hence, any journal ranked on this list will be highly selective/regarded journals.

[Editor's note 2] An update of this ranking is planned for 2025.

ABS 2024 — Association of Business Schools Academic Journal Quality Guide October 2024

The first version of this list was published by Bristol Business School in June 2004, while the 2nd version appeared in 2005 as the Harvey Morris Business Journals List. In converting the 2nd edition of the HM List to the ABS editors followed a nine-stage procedure involving significant peer review and review of the quality standards, track records, contents and processes of each journal. For the 2nd (Mar 2008), 3rd (Mar 2009), 4th (Mar 2010), 5th (Feb 2015), 6th (Mar 2018), 7th (Jul 2021) and 8th edition (Oct 2024) expert review panels considered feedback from academic associations, publishers and individual academics. Further details: <https://charteredabs.org/academic-journal-guide/academic-journal-guide-2024>

[Editor's note] In order to keep the JQL to a manageable length, lower-ranked journals (1-2) were only added if they already featured in the JQL. Also excluded were journals in the area of law, education (unless related to Management), psychology (unless related to OB), general social sciences (unless related to Management) and medicine.

[Editor's note] The 2024 edition is an intermediate review of the Guide rather than being a full evaluation of the complete set of journals in the Guide. This edition introduced downgrades for a handful of journals, upgraded four journals (two in Political Science and two in Entrepreneurship) to Journal of Distinction status, and upgraded about a dozen journals by one rank. The main change, however, was the addition of some 100 journals ranked 1 and 2. As most of these journals were not included in the JQL (see note above), those interested in these new additions will need to refer to the ABS website.

Rank	Interpretation
4*	A world elite journal
4	A top journal
3	A highly regarded journal
2	A well-regarded journal
1	A recognised journal

EJL 2024 — Erasmus Research Institute of Management Journals Listing

The strategic purpose of the ERIM Journals List is to contribute to the quality of the scientific output of ERIM and to the academic reputation of the institute (see <http://www.erim.eur.nl/ejl>). The ERIM Journals List (EJL) helps to define the core domain of ERIM and provides direction as to the type of publications that ERIM would like to produce. The practical purpose is to guarantee to the ERIM members and aspirant members that publications in the journals of the EJL will qualify for membership.

The EJL is believed to cover the whole field of research in management, as far as the ERIM research programs are concerned. This does not imply that no credit will be given for publications in journals that are not on the EJL. It is impossible to make an exhaustive list of all the journals in the domain of research in management. The ERIM journal list is based on judgment by peers and (ISI) impact scores. The first edition of the list came out in 2002 with regular updates since. The current version will remain valid for four years (2024-2028).

[Editor's note] If a journal of the EJIM list was not already included in the JQL (which apart from half a dozen Dutch journals was rare), it was only added if it had a score of S or P(A).

Rank	Interpretation
P*	Top journals among P
P	Best journals in the field
PA	Top international journals (aspirant). PA journals will be transferred to the Secondary Set in the ERIM Journals list unless ISI coverage with a sufficiently high impact factor has been attained with the next update.
EP*	Non-EJL journals (in different disciplines) in the Web of Science 1 st Decile for their sub-discipline.

EP	Non-EJL journals (in different disciplines) in the Web of Science 1 st Quartile for their sub-discipline.
S	Scientific refereed journals of a recognized academic reputation that do not reach the quality levels of the Primary Set
M*	Top managerial journal

Scopus 2024 — Scopus CiteScore 2023, published May 2024

CiteScore™ is Elsevier's free alternative to the Clarivate Web of Science Journal Impact Factor (see: <https://www.scopus.com/sources.uri>). The 2024 CiteScore counts the citations received in 2020-2023 to articles, reviews, conference papers, book chapters and data papers published in 2020-2023, and divides this by the number of publications published in 2020-2023. It differs from the WoS Journal impact factor by having a 4-year publication window and being based on Scopus data rather than Web of Science data.

Note: Just like the Journal Impact Factor the CiteScore is **not** field normalized. Hence it should not be used to compare journals across fields.

VHB 2024 — Association of Professors of Business in German speaking countries, Autumn 2023

A detailed white paper on the construction of this list (and the limitations of journal rankings) can be found here: German Academic Association for Business Research, April 2024: VHB Publication Media Rating 2024. Whitepaper. URL: <https://vhbonline.org/en/service/vhb-rating-2024/>.

The VHB Rating 2024 consists of 18 area ratings that evaluate the scientific quality of publication media from the viewpoint of the 18 Scientific Commissions of the VHB. These area ratings cover the full range of themes within business studies, while also accounting for the field's heterogeneity. The assessment is based on a survey of the voting members of the scientific committees at the beginning of 2024. As experts in their respective fields, the voting members are well-equipped to provide a comprehensive evaluation of the publication media landscape.

Each SC was responsible for its area rating. The area rating publication media catalogues were compiled by the SCs themselves in the fall of 2023. The catalogues were completed either via a bottom-up approach, a top-down approach, or a committee-based approach and cross-checked in a rigorous, multi-stage quality assurance process. A total of 1,175 voting members (out of 2,129 invitations) from all 18 SCs participated.

[Editor's note 1] The VHB rating does not present a collated ranking. This means that many journals appear on multiple disciplinary rankings, in some case with slightly different ratings. Where this was the case, the highest rating was included in the JQL.

[Editor's note 2] In some disciplines the VHB rating also ranks conferences and other publication outlets. As the JQL is a journal ranking these were not included.

[Editor's note 3] In order to keep the JQL to a manageable length, lower-ranked journals (ranking B-D) of the VHB list were only added if they already featured in the JQL. The same principle was applied to German-language journals. The list also included a range of Engineering and Computer Science as well as Health journals that were not included in the JQL as they were seen as less relevant to Management/Business/Economics.

Rank	Interpretation
A+	World leading
A	Leading
B	Important and respected
C	Recognised
D	Peer-reviewed
